House Majority Policy Committee
August 21, 2012

My purpose here today is to promote job creation and make recommendations to the committee.

- We need to expedite PennDot and DEP permit and approval process. (Cite examples.)
- The need to extend state and local permits as soon as possible.
- Get Government "off of our back" and modify the MPC as necessary.
- We need a system of "checks and balances".
- Municipalities sometimes abuse their power leaving the applicant with little if any choice.
- Our State should be a "right to work state".
